

Use Case: Get all drivers and shuttles

Primary Actor: Admin

Scope: Admin gets all drivers and shuttles

Brief: Admin is able to view all drivers and shuttles and display them so they can be seen on the page and database

Stakeholder: Admin

Post Conditions: Drivers and shuttles are displayed on the page and database

Preconditions: Admin plugs in the drivers and shuttles available

Triggers: Admin pulls them from the database or plugs their information in automatically

Basic Flow:

- a. Admin plugs in or pulls all drivers and shuttles
- b. All drivers and shuttles will be visible on the page and in the database
- c. Admin can now assign drivers to vehicles for the requests
